About This Game

The Great War 1918 is a WW1 modification for Company of Heroes, focusing on the last year of the First World War. Currently it features the British Expeditionary Force and the German Empire as opposing factions; however new nations will be brought over time, such as France and Austria-Hungary. The mod focuses on a realistic and accurate representation of warfare in 1918 while keeping a balanced and enjoyable gameplay.

Experience the great operations of the last year of the Great War as Germany breaks through the Western Front in the Spring Offensive; as the Entente, liberate France and Belgium in the Hundred Days offensive. Look forward to heavy artillery strikes and the infamous gas attacks. Trenches will provide vital cover for infantry while tanks will roll over the battlefield and instil fear into the enemy.

Yes yes very nice, victorian dudes smooching each other as part of a revenge plot, 10/10 would unlock all h scenes again. This is actually a pretty fun game, at least single player wise. It scratches a nice itch I've been wanting for a long time, arcade style death match with planes.

Does the game have flaws? Absolutely. But do those flaws detract from the game? Not really, in my opinion. Is it a bad game? No. Not a by a long shot. It could be better but it certainly could be a lot worse.. Great storyline. Once you start, you're gonna want to keep playing to see what happens. Find your upgrades like Metroid. I highly recommed it.. The skullport expansion is fantastic! It introduces a new mechanic while expanding on the base gameplay. If you liked the base game but need to mix it up this is way better than the other expansion (undermountain).. This is actually pretty cool; it's probably the earliest space-fight simulator I've ever played and it's got tutorials/help to tell you how to play the game properly. That said, I sucked at it (I'd forgotten how punishing older games can be). I found the mechanics much easier to grasp than earlier games in the franchise. ***. Isnt the best game out there to spend your money on, got discount, bought it, waste of money. A strange arcade style puzzle brawler where you and three buddies cosplay as various disney and pizar characters from a handful of franchises. Sadly, "Universe" lacks many other franchises characters.

EDIT: Stars guage power level, and they apperently persist and stay with ther costume. I consider that an honest mistake because it's certainly not explained.

Gameplay is a brain-numbing objective based brawler where you do what the game tells you and beat up anything that gets in your way. Enemies are actually fairly sophisticated. They infight, they build traps, they steal objective objects and run away with them; This makes having a lot of enemies on screen extremely entertaining rather than irritating like other titles. Even though you won't see them the first time, there are models for every type of unit for every theme. Playing with a lot of friends will thus probably bring out the hardest enemies in the highest quantity.

Every area is composed of three stages. The third has a boss. There are three areas to a theme. You unlock costumes by completing each area, with many costumes being unlocked by simply replaying levels.

After awhile you start to get bored of the uniform design of the levels. While every level tries to introduce new mechanics some of them begin to get more intricate. I call it a puzzle brawler because that's what it is, you lack alot of mobility other such games have. There are jump puzzles, and they tend to be very irritating as some manuevers the game expects you to do often have a high chance of making you respawn. Even with a few deaths the game rarely gave me any better than bronze while solo.

Get it cheap, especially if you have friends that enjoy drinking. Buy a few packs of beer and drink every time you respawn, that'll make the game far more entertaining. The lack of real story and limited selection of costumes can be a drag, and the gameplay tries to be inventive but the core player abilities are just dull.

Gave me a heart failure. plz no papa, not again :(Great crash'em up racer. Love that sound of zombies splattering against the grille!. No... Just no. Please. I knew that some games are bad, but not THAT bad! First of all, the guns don't work, the bullets just fly straight through 2d sprites which supposed to be enemy NPCs. Second of all, the movement speed is somehow slower than a turtle with broken legs. And third, who the hell would buy this? How do games like this sh*t get into steam? Valve has completely given up on filtering games. Not worth even 60 cents. Missile Cards is great fun! I have never liked/played card games before - but I love the original Missile Command. The gameplay video caught me, so I went ahead. I think it's a great game.

. I never knew I wanted to feel like Captain Mifune at the end of Matrix Revolutions yelling "AAAAAAAAAAAAAAAAARRRRRRRRRRRRGGGGGHHHHHHHHH!!!!" as he unleashed a storm of bullets upon a neverending stream of machines.

Now I know.

Feels good, man.

. I was first sceptical, especially after the first few playthroughs but I'm a sucker for upgrades when done right and slowly but surely I became stronger and next thing I knew a 10 minute play session turned into two hours and now I'm hooked. If you like planet hopping physics and planting seeds to make planets grow (and give you health) then this is for you. I'm a 33 year old male and find it hard to get into games the older I get, even though I still love them. So, if you find yourself in the same boat and are looking for a casual game where you die often (and that's okay) then this is for you! Anyway, I'm not great at writing reviews, this is my first one. I liked the game that much I felt compelled to come here and tell you all that I love it!. Oh hey lady! Wait don't kill me!

(Also, where are those 2 episodes??!) [I know, they closed down]

+ : great artwork, ok sounds, playable graphics (not great tho), weird story, gamepad supp

- : it will never be finished, camera stupid af, sometimes buggy, bad controls

Buy at your OWN RISK! 2.5/10 would ask the killer lady out again (died 100% worth it) [nah lol run away]. its a fun game but as of feb 9 2015 the ai still clips through the oncoming traffic and keeps going.alot of times coming into a corner you cant use two keys like turn and thottle it one or the other 99.9% of any other car games will let you turn and gunit sort of a power turn this doesnt yet. and the two buttons at the bottom of the screen the a and b i guess is enter and escape noway to map that in game.even with this i still find the game fun and worthwhile if you like car racing older cars and to expand on that would be real nice if the company would comeout with some dlc for more cars and tracks. but firt i hope they patch the ai going total trough oncoming traffic and acutaly get hit .and i hope they fix the other keyboard problems so you can turn and trottle or turn and brake at the sametime now you cant its one or the other.i still recommend this game but they just need few more patchs and some dlc and it would be a great hame in my opinon.. Game Visuals

I want to mentioned that the visuals in the game is well done. The visuals can be adjusted in the game's option menu.

Game Audio

I want to mentioned that audio for the game is well done. Even though the audio is somewhat simplistic and repetitive. The audio can be adjusted in the game's option menu as well.

Gameplay

This is a time strategy game, where careful planning is required, due to limited amount of resources that are available.

There are three different difficulty game modes to choose from: Normal; Multi-task; Relaxed. The difference between these difficulty game modes are: Timer Speed and Scoring. The normal mode, the timer speed and scoring is low. The multi-task mode, the timer speed and scoring are moderately high. The relaxed mode, the timer speed is frozen and scoring is moderately high.

There are three different chapters with thirty level in total. All levels can be replayed for better scoring and star rating.

All levels has three star rating system. The stars are earned from playing the game. The star rating system represents how fast the levels has been completed. Three Stars (Gold;) Two Stars (Silver;) One Star (Bronze.) There is an opportunity to replay levels for better star rating.

There are several different special power ups to help complete the level faster. These special bonus power ups comes with a time limit. But they can be used again after they have been recharged overtime.

There are twenty-three sets different achievements that can be unlocked from playing the game. Each of these achievements does come with some requirements that needs to be completed before they can be unlocked. These achievements are in-game only.

Miscellaneous

Final thoughts: I have found the game enjoyable to a certain extent. The replay value for the game is low. I would recommend this game, but not at the game's full price value.
