wav files with any quality settings that the software's primary task - to make sounds more obvious by changing the volume of individual frequencies - it accomplishes. Simply drag the file you want to splitter into the program's window, leave the audio source selected, and click the "Make" button. Your vocal track will be split into two new files with loud and soft sections of the audio. Try it out here and take a listen! Download vocal splitter These days it's tough to find a decent .wav file. If you have a 16 or 24-bit .wav and want to make a .aiff file for your audio file's second speaker, vss .aiff provides one-click conversion. Once you have the program selected, drag the .aiff file you want to split into the window. At that point, you can click the "Split" button or press Enter. After a few seconds, you'll be able to preview the .aiff file and a .wav file with the mono version of the audio track. When you're happy with the results, click the "Generate" button to save the file. With just one click, you've transformed a file from mono to stereo .wav for playback in any audio player. Download vss .aiff Finale .aiff plugin enables you to turn single sound files into multi-channel .aiff tracks. The software is made to convert files from Audio Units to .aiff. You can convert and split a mono .aiff file into three sound files for playing in Premier via the dsp folder. Make sure you select the appropriate size for your audio file before you start the task. Finale's .aiff plugin makes it easy to select a single sound and then run the program's conversion process. Once you've saved your .aiff file, you can access it in any program that supports the .aiff format. To save space, check the ZIP only option in the Output Folder drop-down menu to keep only the converted file. Download finale .aiff Super Duper can batch splitter .wav files. With this straightforward .wav splitter, you can listen to the .wav file as it is split, record it as two 82157476af
